

The Obsessive Compulsive Disorder Research Program at Brown Medical School/Butler Hospital is currently inviting applications for a post-doctoral fellowship position coordinating an NIMH-funded R01 investigating dimensional endophenotypes in anxiety and OC spectrum disorders. The postdoctoral fellow will be responsible for assisting with neuroimaging (fMRI/DTI) and psychophysiological components of the research, supervising clinical evaluations, and writing manuscripts. Additionally, this 2-year fellowship will provide opportunity for grant writing and supervised clinical hours for licensure.

We are especially interested in candidates with a strong research background and proven track record of scholarship, experience with neuroimaging and/or psychophysiology, and strong data analytic skills. For further details regarding application, please visit the Postdoctoral Fellowship link on our website at: www.brown.edu/go/clinical-psychology-training.

For questions regarding this position, please contact Tina Boisseau, PhD (christina_boisseau@brown.edu).
