

Dear Sir or Madam,

I am a member of ABCT (membership #: 8426). The Depression Clinical and Research Program at Massachusetts General Hospital in Boston is currently looking to fill research coordinators position to start either in March or June of 2017. We're looking for ways to advertise the position to graduating undergraduate seniors who may be interested in psychology-related jobs.

Would you be willing to post the attached job description on to any relevant panelists for seniors or on the ABCT listserv (e.g. psychology majors or premed students)? The position is full-time, lasts through June 2019, and is a great opportunity for people considering careers in clinical psychology or medical school.

If you believe there are any other ways for us to announce this job opening to interested candidates, we would greatly appreciate that information as well.

Thank you very much for your assistance! Please feel free to contact me if you have any questions.

Sincerely,

Joey Cheung

Clinical Research Coordinator

Massachusetts General Hospital

Depression Clinical and Research Program
