

## Postdoctoral Research Associate - UNC

The Department of Psychology and Neuroscience at the University of North Carolina, Chapel Hill is accepting applications for a fulltime postdoctoral research associate within the Biobehavioral Research on Addiction and Emotion (BRANE) lab. The postdoc will contribute to ongoing studies in the lab, with an emphasis on a NIDA R01 examining how the neural correlates of reward sensitivity predict treatment engagement and response to substance use treatment, using the 7T fMRI scanner at the UNC Biomedical Research Imaging Center (BRIC). The position responsibilities will include fMRI study design and oversight, fMRI data management and analysis, manuscript preparation, and grant writing. The postdoc will receive mentored training in translational research and grant writing, have numerous opportunities to assist in the preparation of manuscripts using data from existing datasets, as well as opportunities for developing an independent program of research. Requirements include a PhD in psychology or neuroscience, peer reviewed publications using neuroimaging methodology, and a minimum of two years experience in fMRI data acquisition and analysis. Additional details about the BRANE lab can be found at [www.daughters.web.unc.edu](http://www.daughters.web.unc.edu). Applications can be submitted until February 1, 2017 at <https://unc.peopleadmin.com/postings/111383> .
