

# TIRR Memorial Hermann

## Rehabilitation Neuropsychology Positions

TIRR Memorial Hermann Rehabilitation Network in Houston, Texas, is expanding services and is recruiting for **three full-time clinical rehabilitation neuropsychologists**. The TIRR Memorial Hermann Rehabilitation Network is a citywide network of rehabilitation facilities backed by TIRR Memorial Hermann, an internationally recognized leader in rehabilitation, providing state-of-the-art stroke, general rehabilitation, brain injury, spinal cord injury, amputation and neurodegenerative rehabilitation programs in a supportive, collaborative, and patient-centered environment.

TIRR Memorial Hermann Hospital is located in the Texas Medical Center (TMC), which is the largest medical center in the world, and is the 8<sup>th</sup> largest business district in the United States. Home to two medical schools and affiliated with 9 other colleges and universities, the TMC is an exciting place to work, study, and participate in research and clinical care. Houston is the most diverse city in the country, and is a welcoming and exciting community in which to live.

- Rehabilitation Psychologists and Neuropsychologists provide assessment, intervention, and consultative services as part of a dynamic, interdisciplinary team serving a variety of clinical populations (CVA, amputee, orthopedics, complex medical conditions, brain injury).
- The Psychology/Neuropsychology department at TIRR Memorial Hermann serves as a teaching location for neuropsychology graduate students from the University of Houston, offers a clinical psychology internship rotation as part of the Baylor College of Medicine Clinical Psychology Internship program, and offers both a CCTC listed Rehabilitation Psychology Fellowship program and an APPCN-credentialed Fellowship program in Clinical Neuropsychology, and our psychologists are actively involved in these training programs.
- Successful candidates may have opportunities to provide services at more than one location within the TIRR Network.

### Positions currently available:

1. **Staff Clinical Neuropsychologist:** Primary work setting is Memorial Hermann Hospital – TMC. MH-TMC is a large, acute care hospital with Level One Trauma Center. This role would focus primarily on consultation and treatment to the inpatient rehabilitation unit, as well as on consultations for heart and vascular transplant, renal transplant, and liver

transplant patients and other acute medical consults. While a background in clinical neuropsychology is preferred, candidates with strong backgrounds in health and/or rehabilitation psychology would be considered.

2. **Staff Clinical Neuropsychologist:** Primary work setting is at TIRR Memorial Hermann – TMC hospital working within the Brain Injury and Stroke Program. This position would involve 80% inpatient care and 20% outpatient neuropsychological services. Strong experience in behavioral management for persons with acquired brain injury is preferred.
3. **Staff Clinical Neuropsychologist:** This role would involve provision of rehabilitation neuropsychological consult-liaison services for inpatient rehabilitation in our TIRR MH Community Hospital settings, as well as outpatient neuropsychological assessment services.
